Certifications

Certificado Verificado de edX para el curso Data Science: R Basics
Certificado Verificado de edX para el curso Data Science: Visualization
AWS Cloud Technical Essentials
Building with the Claude API
Introduction to Model Context Protocol

Facundo Fernandez Miguez

AI Engineer @ Globant

San Carlos de Bariloche, Río Negro Province, Argentina

Summary

Hi, I'm Facu

I enjoy building practical GenAI products and scalable cloud infrastructure designed to solve real business problems and work reliably in production.

Experience

Globant

Sr AI Engineer

October 2025 - Present (11 months)

Design and build intelligent agents using LangChain and LangGraph to automate complex workflows and decision processes.

Develop GenAI-powered applications and technical solutions that enhance and streamline client interactions.

Design and implement proofs of concept (POCs) integrating traditional Machine Learning models and Generative AI into existing client products to improve efficiency, scalability, and output quality.

NowVertical ES (Formerly CoreBI)

AI Ops Engineer

October 2024 - October 2025 (1 year 1 month)

I design and manage end-to-end AI architectures on AWS, ensuring scalability, security, and cost efficiency. My work bridges GenAI engineering, cloud infrastructure, and DevOps, using Infrastructure as Code, CI/CD pipelines, and serverless architectures. I deliver LLM-powered applications and agentic workflows that accelerate AI adoption and drive measurable business value.

etermax

AI Consultant

November 2023 - October 2024 (1 year)

I designed and implemented generative AI solutions, leveraging Large Language Models (LLMs), RAG systems, and OCR to solve complex business challenges. By specializing in prompt engineering and fine-tuning LLMs, I delivered scalable, efficient solutions that enhanced productivity.

Nielsen

2 years 10 months

Data Scientist

September 2022 - December 2023 (1 year 4 months)

As a Data Scientist, I used statistics and machine learning models to predict both audience measurement and consumer preference outcomes from different data sources. My day-to-day work involved writing Python and SQL code for Exploratory Data Analysis (EDA), training machine learning models, uploading the results to the data lake in AWS, and sharing my findings.

Senior Modeler

May 2022 - September 2022 (5 months)

I guided modelers to ensure successful delivery of predictive models to clients by reviewing their work and providing feedback to improve model accuracy and reliability. I prepared client presentations to communicate research findings and recommendations in a clear and concise manner. I also developed onboarding training videos for new hires to ensure they are equipped with the necessary skills to perform their duties effectively.

Modeling Analyst

March 2021 - May 2022 (1 year 3 months)

I utilized statistical and regression analysis to estimate the past impact and predict the future impact of various marketing tactics different KPIs to improve ROI. To gather data for analysis, I identified relevant sources and variables to include in predictive models, including public data sets, industry reports and internal data sources. For processing, I used Python and R to clean and prepare the data, perform statistical analysis, and create visualizations.

Banco Interamericano de Desarrollo

External Consultant

February 2020 - December 2020 (11 months)

I was responsible for collecting and analyzing data from all productive sectors in all South American countries. This involved gathering data on various economic indicators, including production, exports, imports, employment, tariffs, subsidies, and level of competition, among others. To collect this

data, I utilized various sources, such as official government reports, industry publications, and databases, and ensured that the data was reliable, accurate, and up-to-date.

Universidad de San Andrés

Research Assistant

August 2019 - October 2020 (1 year 3 months)

Buenos Aires, Argentina

As a Research Assistant, my responsibilities included searching for course materials, reading and recommending literature, and teaching classes to students, with a focus on the Argentine Economy.

Gilbarco Veeder-Root Latin America

Administrative Assistant

August 2015 - November 2016 (1 year 4 months)

Education

Universidad de San Andrés

Master of Arts - MA, Economics · (2019 - 2020)

Universidad de Buenos Aires

Bachelor's degree, Economics · (2013 - 2018)

Colegio Nacional de Buenos Aires

High School Diploma · (2007 - 2012)
